

Submission of models for signing for permanent display in EEP 18

Models created with HomeNos 18 can be viewed and tested in EEP 18 for a period of 24 hours after export. This temporary activation allows the model to be checked directly within the EEP environment before it is used permanently.

If the model is to remain permanently available in your EEP 18 installation, registration and signing by TREND are required. As part of this process, the model undergoes a simplified review to ensure compliance with EEP modeling guidelines and to clearly establish copyright and authorship.

Process Overview

Export your model from HomeNos 18 to EEP 18.

Review the model within 24 hours directly in EEP 18. You may export your model multiple times; the 24-hour period resets with each export.

If you wish to use the model permanently, submit it via the EEP Shop under “My Account → Model Upload” for registration and signing.

TREND reviews and signs the submitted data and model on business days.

Once successfully signed, the model will be available under “My Account → Model Upload → My Uploads” for download and permanent use in your EEP 18 installation.

IMPORTANT!

The upload of unregistered models and the download of registered models are handled exclusively via the designated page in the EEP Shop. Submissions via email or the EEP support portal are not accepted.

Processing takes place on business days and may take up to 48 hours.

Data Stored by TREND

As part of the registration process, the following data is collected:

- Your full name
- Your email address
- Your customer number
- The registration number of your EEP 18 version
- The name(s) of the submitted file(s)
- The log file(s) from the model export
- A preview image of the model

Data Required for Signing

To complete the signing process by TREND, the following files are required:

1. The complete installation file of the model, prepared using the “ModellInstallerCreator”
2. The info log file generated during export from HomeNos 18
3. A small preview image from the 3D window of HomeNos 18 in JPG format, with a resolution of 640 × 480 pixels

WHAT IS MODEL UPLOADING ABOUT?

This form is for uploading your own models. After uploading, our team from eepshopping.de will verify them. Upon successful approval, the model will be signed with your individual R/N number. The finished, signed file will appear in your model library.

TITLE OF THE SUBMISSION. *

The specific name of the model, which may differ from the name of the 3DM file. For example, "Three-bay locomotive shed in Mannheim from Era III"

Title of the submission.

0/255

BRIEF DESCRIPTION OF THE MODEL WITH HASHTAGS *

Use three to five concise words as hashtags that describe the building and its features. Examples include: #three-story, #historicpreservation, #brickconstruction, #GlücksteinQuarter.
